

# Estates & Procurement Help COVID-19

Please find below a comprehensive list of local contractors and consultants with relevant healthcare experience that you may be requiring at this time. Although we are all working differently these days, the message is that we are all still working and are here to help you with all your Estates & Procurement needs.

You will be aware that the Cabinet Office have released a new PPN for Public Procurement regulations allowing emergency procedures for goods and services deemed to pose a risk to life. Contracts can be directly awarded and modified without a new procurement procedure in some circumstances (under Regulation 72(1)).

However, if you feel more comfortable using any of the various procurement vehicles out there, then please speak to us, as this will provide you with comfort by having set procedures, set rates for consultant fees, agreed contractual terms to directly appointment individual consultants or full design teams. These Frameworks will give clients the comfort that the procurement compliance can be maintained whilst progressing the appointment of service at pace. Many of them have waived their fees.

# CONTRACTORS

Carefoots are a principal contractor based in the North West and have worked with the NHS since its inception in 1948. We have a great track record and reputation of working in the healthcare sector on schemes ranging from £250k-£6M.

The John Turner Construction Group is a £75m turnover construction company, operating across the North West region with offices in Preston, Manchester and Liverpool. We are a privately owned business and have been established since 1907.

With divisions covering Construction, Maintenance, Joinery Manufacturing and Electrical Services, the company has acquired a wealth of experience and a proven track record within the construction industry and we undertake a variety of building, refurbishment and maintenance contracts which can range in value up to £20m per project.

The Group employs over 200 personnel and we have a policy of direct employment within our workforce as this guarantees us the flexibility, quality control and loyalty necessary for the successful completion of our projects. Achieving a quality finish is a priority and employing direct labour, along with our apprenticeship training programme in bricklaying, joinery and electrical works, ensures we continually achieve high standards.

# CONTRACTORS

Interserve is one of the leading national and regional healthcare contractors; in the North West Trust clients include Liverpool Women's, The Walton Centre, Liverpool Heart & Chest, The Christie and Wythenshawe Hospital. As a direct response to the Covid-19 crisis we have established a rapid response team. Our key supply chain partners have resource availability to support this.

We anticipate typical projects to involve the conversion of space into critical care or HDU; the conversion of non-clinical space into isolation or segregation monitoring areas; providing secure areas for segregation and the provision of temporary or prefabricated buildings for clinical or non-clinical areas.

## DAY

DAY Architectural is an expanding and progressive medium sized RIBA Chartered Architectural Practice with a Head Office in Central Manchester.

Our Directors have extensive experience in various sectors of the construction industry, in particular healthcare. Over recent years DAY has grown to service a variety of scale of healthcare projects within the acute, primary care and mental health arena. Our dedicated team possesses an enviable depth of expertise, in a sector that forms the cornerstone of society. We continue to develop and nurture our understanding of this highly rewarding area of design, blending creativity and experience to deliver cutting edge facilities for health and social care. This is further complimented with our additional sector experience within education, residential, commercial, mixed use and master planning capability.

Unlike many other Architectural Practices, DAY also ensures Director Involvement in all projects from inception through to completion, with a clear and pragmatic approach to brief development through close collaboration with Clients.

## IBI HEALTHCARE+

IBI Group is a global architecture, planning and technology practice that have a healthcare specialism in our fifty strong team based in Manchester and Rochdale. We are recognised for our practical and efficient development of design solutions that are based on a thorough understanding of the full range of technical requirements for healthcare settings.

We are able to support organisations with immediate effect in the following areas;

- The development of proposals to support the conversion of existing hospital facilities to facilities to support COVID-19 patients in line with NHS Publication 001559, dated 22<sup>nd</sup> March 2020. Management of implementation of design solutions working in conjunction with estates teams.
- Developing options for rapid implementation to support temporary increasing of capacity, and management of implementation of same, including dialogue with other respective public sector organisations.
- Engaging direct with the supply chain and members of NHS SBS Modular framework to develop solutions for implementation and engagement with other regulatory bodies (LPAs), including testing facilities / temporary isolation facilities.
- Management of engagement with suppliers/sub-contractors of materials and services in respect to implementation.
- Identification and management of spaces to support healthcare workers when 'off-shift', including engagement with student accommodation providers / hotels.

# ARCHITECTS

10architect is a niche and agile firm, to feel like a start-up, to respond to the desire to work more closely and collaboratively with clients - to work in a way where the client is part of the journey and delighted by the reward of delivering excellent buildings. Our directors previously led multi-national practices, with a focus on healthcare delivery projects. Our hand-picked team of architects and designers provide a dedicated and bespoke high-end service to our clients, and are specialists in Healthcare. Our work is diverse and often complex, but always rooted in a practical and deliverable approach, with the emphasis of the building being on social value.

Powered by BIM and using the latest digital cloud techniques to bring people together and address directly the growing digital isolation is fundamental to collaboration and building strong lasting partnerships. As a leading exponent of virtual reality we have made it the heart of our business to be at the cutting edge of technology. We are based in the North West, and given our current working from home approach, along with our technological ability, we have staff who are currently based in the Greater Manchester, Merseyside, Cheshire and Lancashire areas, allowing us to provide a fast turn around, with the ability to pull our wider team together seamlessly using technology to collaborate quickly on fast paced and difficult projects.

# Ryder

We bring international experience of working with hospital management teams to design healthcare facilities that provide flexible, efficient space models and uplifting person centred environments that support new working practices and attract and retain the best clinical staff. Our approach to healthcare design promotes human dignity and responds to community to convey a feeling of security, confidence and reassurance within a holistic, uplifting, caring and working environment.

We have delivered over 1,000 healthcare projects of various scales and specialisms from ward refurbishments to major acute hospital projects. In the north west we have excellent local knowledge of most NHS Trusts, the regional health context and local planning authorities and offer specialist planning support and inhouse Principal Designer services. We are experienced in implementing modular solutions and the extensive use of modern methods of construction including offsite fabrication to deliver high quality environments to challenging timescales.

# ARCHITECTS

# AFL

architects

AFL create Architecture For Life. We deliver healthcare developments with purpose, high functionality and lasting design, drawing from experience with over 50 Trusts across the UK.

We are able to immediately mobilise resources to urgent COVID-19 projects and are already working on priority schemes in the north west. Our teams are renowned for their flexible approach and strength of communication, each member committing themselves wholly to each project. We are particularly skilled problem solvers, successfully managing complex phasing projects often within acute and emergency wards, while also ensuring the utmost health and safety of staff, patients and visitors, particularly in regards to infection control measures.

Our healthcare specialists can also draw from the expertise of our wider leisure and residential teams to find solutions to current issues. This includes converting non-healthcare environments into emergency care spaces, exploring options for the provision of accommodation for key workers, utilising BIM expertise to discover the most efficient and effective use of a converted healthcare space, and liaising effectively with wider public sector stakeholders to find mutual solutions to community-wide emergencies.

We are the world's premier infrastructure firm, delivering professional services throughout the project lifecycle. We're planners, designers, engineers, consultants and construction managers driven by a common purpose to deliver a better world.

Every day, healthcare professionals and scientists are producing ground-breaking medical feats in transformative research centres and state-of-the-art medical centres all over the world. Clients rely on AECOM to solve challenges that healthcare systems face when planning new and renovated facilities — and the importance of getting it right is critical.

We are a leader in delivering acute care, ambulatory and critical care centres, specialized laboratory spaces, biomedical research facilities, life sciences centres, senior living housing and medical administrative buildings. The constant advancement of technology, ever-changing patient demographics, and more stringent regulations is critical in the healthcare market, and our technical professionals are acutely aware of the complexities and requirements.

**MODERO**

Modero Limited formed in 2005 specialising in the provision of Quantity Surveying and Project Management services. The range of services provided by the company has a specific emphasis on cost effective design through cost control and contractual advice from inception to completion.

We have worked with and continue to work with the leading healthcare architects in the region. We have also built similar long-term associations with the clients by the creation of excellent working relationships based on professional trust through regular, informative and responsible interaction.

Modero Limited have carried out Quantity Surveying/Project Management services on schemes for Liverpool NHS Foundation Trusts for 15 years. Currently we have live schemes at Arrowe Park Hospital, Broadgreen Hospital and Royal Liverpool Hospital.

# PM / QS / SURVEYORS

DAY Project Management can provide class-leading project management support across the region from our Manchester Office. All of our project managers have excellent healthcare experience, including time based on secondment with NHS Trusts, working in partnership with the Capital Projects Teams at Trusts such as Lancashire Teaching Hospitals, The Christie, Lancashire Care and Pennine Care. We focus almost solely on healthcare and work on a range of projects from £25,000 refurbishments up to schemes such as the £67m Salford Major Trauma Centre.

We work in partnership with all of the major design and construction partners in healthcare and we have members of the team who have received national awards for their project management skills in the healthcare industry. We would be delighted to discuss how we can help you get your projects delivered in these challenging times.

We have an experienced team of Project and Commercial Managers with extensive NHS and Healthcare experience. Our teams have experience in working in high pressure and live healthcare environments, from mental health inpatient units, to Acute Wards and theatres and also specialise in dealing with incident response projects, including the fire at The Christie.

Recom also provide construction management, acting as main contractor on many varied types of construction projects and have the resource and capabilities to carry out works immediately as required by the NHS.
